

OSH – ARC

OPERATION'S SYSTEM HUB
Archiving System

Its Purpose

To automate and streamline existing processes of data inputs, monitoring and information generation about Store Regulatory Requirements

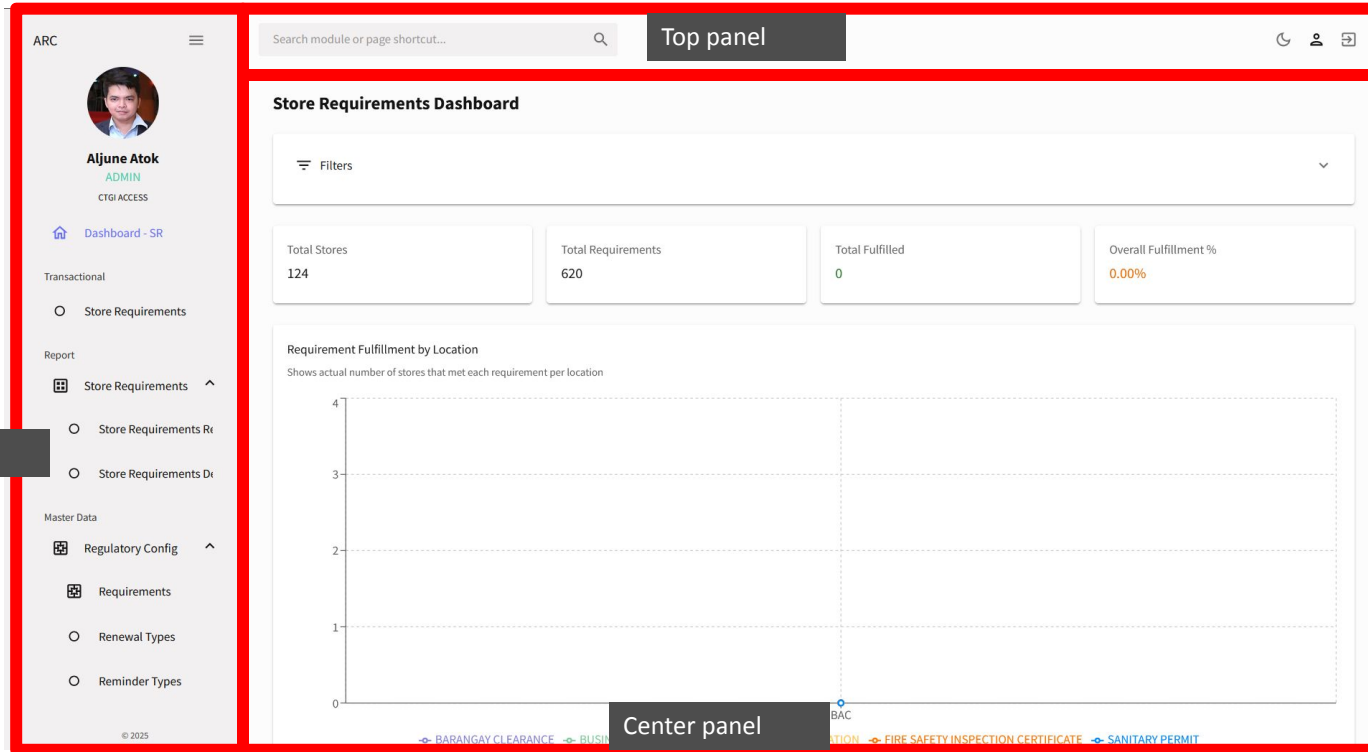

Current manual process and other data sources to be bond as **ONE SYSTEM.**

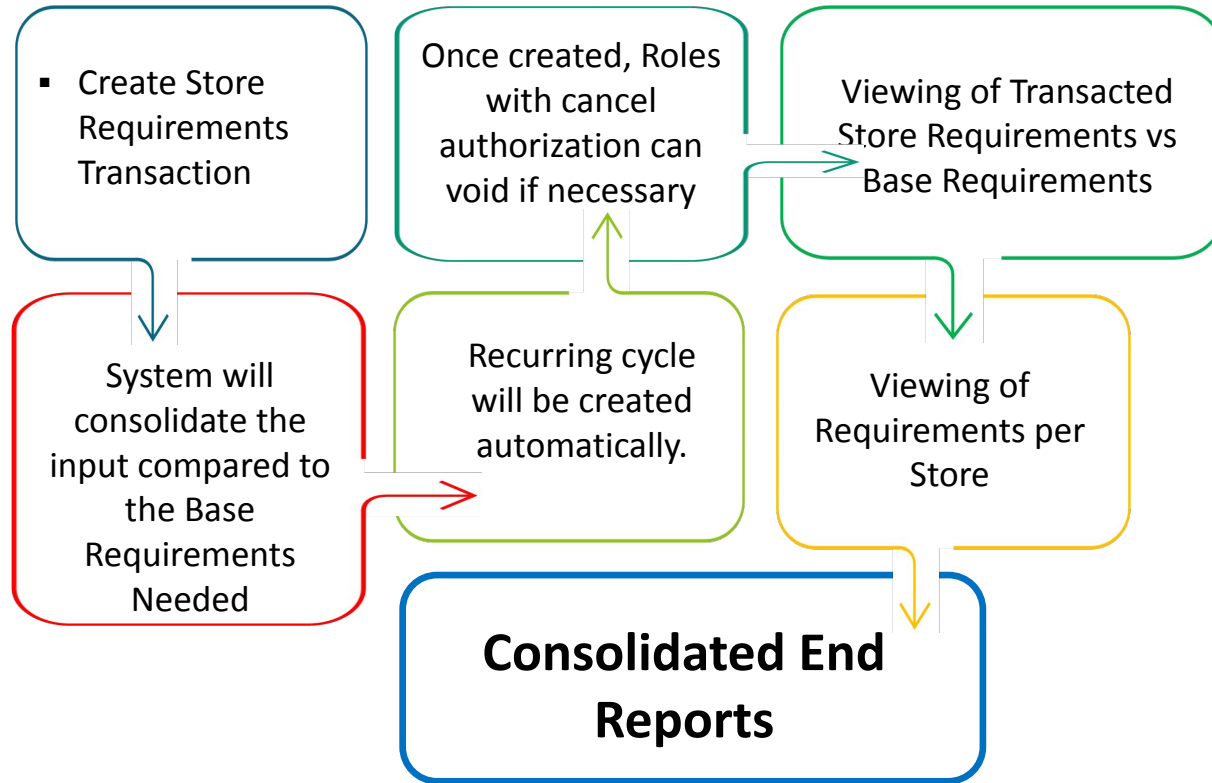

Objectives

- Provide centralized visibility of nationwide store requirements
- Automate recurring store requirement cycles
- Accelerate and standardize report generation

System Layout

System Flow

Identified Roles

- Operation Support Associate (OSA)
- Operation Support Supervisor (OSS)

Modules – OSA

Transactional Store Requirements – used by OSA for the following transactions:

- Processing store requirements via bulk or batch upload per requirement
- Viewing store requirements, including base requirements and previously transacted requirements

Modules – OSA

Store Requirements Reports involve the generation of the following:

- **Store Requirements Report** – provides a consolidated view of all store requirements
- **Store Requirements Detailed per Store Report** – provides a detailed breakdown of store requirements at the individual store level

Modules – OSS

Transactional Store Requirements – used by OSS for the following transactions:

- Processing store requirements via bulk or batch upload per requirement
- Viewing store requirements, including base requirements and previously transacted requirements
- Cancellation

Modules – OSA

- Master data of Regulatory Requirements viewing

Features/Pros

- Intuitive and Responsive UI
- Centralized System
- System Notification via email

Cons

- Can't be used when offline
- Need a capable device to transact forms with large data

FAQ

- Why the system can't be accessed?
 - It must be due to slow internet connection since the system is online
 - The URL was misspelled. Must be **osh.chookstogoinc.com**
 - The server was unexpectedly not available, Server Down

THANK YOU
